Primary Science Facts – (Worksheet 18)

Circle the letter of the answer that correctly indicates whether the science fact shown is true or false.

1. Humans are the only animals that can live over 100 years.  
   True or False:  
   a. True  
   b. False

2. Humans are the only animals that can walk upright.  
   True or False:  
   a. True  
   b. False

3. Humming birds can fly backwards.  
   True or False:  
   a. True  
   b. False

4. Hummingbirds cannot walk.  
   True or False:  
   a. True  
   b. False

5. It takes the body only 2 hours to completely digest eaten food.  
   True or False:  
   a. True  
   b. False

6. Mass and weight are the same and they are equal at all times.  
   True or False:  
   a. True  
   b. False

7. Mass is a quantity that you get by weighing an object.  
   True or False:  
   a. True  
   b. False

8. Monkeys can make simple tools that they use to gather food.  
   True or False:  
   a. True  
   b. False

9. Some metals can be liquid at room temperature.  
   True or False:  
   a. True  
   b. False

10. Metals such as Iron and Nickel are attracted to magnets.  
    True or False:  
    a. True  
    b. False
Key to Primary Science Facts – (Worksheet 18)

Circle the letter of the answer that correctly indicates whether the science fact shown is true or false.
