Equivalent Fractions – (Worksheet 6)

Fill in the numerator that makes each pair of fractions equivalent.

1. \( \frac{1}{5} = \frac{\square}{30} \)
2. \( \frac{1}{5} = \frac{\square}{40} \)
3. \( \frac{1}{5} = \frac{\square}{85} \)
4. \( \frac{1}{5} = \frac{\square}{15} \)
5. \( \frac{1}{5} = \frac{\square}{45} \)
6. \( \frac{1}{5} = \frac{\square}{70} \)
7. \( \frac{1}{5} = \frac{\square}{100} \)
8. \( \frac{1}{5} = \frac{\square}{90} \)
9. \( \frac{1}{5} = \frac{\square}{150} \)
10. \( \frac{1}{5} = \frac{\square}{300} \)
Key to Equivalent Fractions – (Worksheet 6)

Fill in the numerator that makes each pair of fractions equivalent.

1. \[ \frac{1}{5} = \frac{6}{\square} \]
2. \[ \frac{1}{5} = \frac{8}{\square} \]
3. \[ \frac{1}{5} = \frac{17}{\square} \]
4. \[ \frac{1}{5} = \frac{3}{\square} \]
5. \[ \frac{1}{5} = \frac{9}{\square} \]
6. \[ \frac{1}{5} = \frac{14}{70} \]
7. \[ \frac{1}{5} = \frac{25}{100} \]
8. \[ \frac{1}{5} = \frac{18}{90} \]
9. \[ \frac{1}{5} = \frac{30}{150} \]
10. \[ \frac{1}{5} = \frac{60}{300} \]
