Primary Science Facts – (Worksheet 26)

Circle the letter of the answer that correctly indicates whether the science fact shown is true or false.

1. The right side of your brain controls the right side of your body:  
   True or False:  
   a. True  
   b. False

2. All babies are born without any teeth:  
   True or False:  
   a. True  
   b. False

3. Antibiotics are used to fight off viruses:  
   True or False:  
   a. True  
   b. False

4. Babies blink five times more often than adults:  
   True or False:  
   a. True  
   b. False

5. Light travels faster through glass than through air:  
   True or False:  
   a. True  
   b. False

6. The longest living cells in the body are the brain cells (neurons):  
   True or False:  
   a. True  
   b. False

7. Maggots can be placed into open wounds to help with healing:  
   True or False:  
   a. True  
   b. False

8. Water boils at a higher temperatures at higher altitudes:  
   True or False:  
   a. True  
   b. False

9. Pure water has no smell or taste:  
   True or False:  
   a. True  
   b. False

10. Water covers only 30% of the Earth’s surface:  
    True or False:  
    a. True  
    b. False
Key to Primary Science Facts – (Worksheet 26)
