# Primary Weather Science – (Worksheet 1)

Circle the letter of the correct weather term on the right side that is defined on the left side.

1. A kind of precipitation  
   a. dust  
   b. rain  
   c. wind  

2. A dangerous very large wind storm  
   a. hurricane  
   b. dust devil  
   c. breeze  

3. Hot, moist weather conditions  
   a. humid  
   b. frosty  
   c. windy  

4. When rivers rise until they overflow  
   a. sleet  
   b. flood  
   c. drought  

5. A cloud that's down at ground level  
   a. sprinkle  
   b. mist  
   c. Fog  

6. Water that condenses on the grass at night  
   a. dew  
   b. fog  
   c. rain  

7. A spinning vortex of water over the ocean  
   a. waterfall  
   b. high tide  
   c. water spout  

8. Small frozen drops of rain  
   a. sleet  
   b. hail  
   c. snow  

9. White frozen dew that forms on the grass  
   a. blizzard  
   b. frost  
   c. white out  

10. A large cloud of wind blown sand  
    a. dust storm  
    b. thunder  
    c. rain storm  

11. Large damaging spheres of ice raining down  
    a. rain  
    b. sleet  
    c. hail  

12. A destructive vortex of spinning wind  
    a. breeze  
    b. tornado  
    c. gust  

13. Tons of snow tumbling down the hill  
    a. rock slide  
    b. avalanche  
    c. snowfall  

14. Heavy falling and blowing snow  
    a. blizzard  
    b. flurries  
    c. sprinkle  

15. Getting no rain for months or years  
    a. spring  
    b. summer  
    c. drought
Key to Primary Weather Science – (Worksheet 1)

Circle the letter of the correct weather term on the right side that is defined on the left side.

1. A kind of precipitation
